SUMMARY

Flutter Developer with hands-on experience building responsive, cross-platform mobile applications using Dart, Cubit (flutter_bloc), Clean Architecture, and REST APIs. Currently contributing to production Flutter apps at BSS FLOW, with a freelance and academic background spanning e-commerce, content, and dashboard applications. Strong focus on scalable architecture, clean code, and effective collaboration with backend and product teams.

WORK EXPERIENCE

Flutter Developer — BSS FLOW

Aug 2026 – Present

- Develop and maintain features for the company's Flutter applications, working closely with the product and design teams.
- Communicate regularly with backend developers to align on API requirements and ensure smooth, reliable integration.
- Participate in daily stand-ups, sprint planning, and code reviews as part of an agile, collaborative team.
- Coordinate with team members to translate requirements into clear, well-structured app features.
- Contribute to a positive, communicative team environment, sharing progress and raising blockers early.

Flutter Developer — Freelance — Restaurant Dashboard Project

2024

- Built a responsive restaurant management dashboard using Flutter (frontend).
- Designed and implemented UI components for menu, orders, and data display.
- Integrated REST APIs to handle real-time restaurant data and operations.

PROJECTS

Bookly App github.com/jwankhalil/Bookly.git

Cross-platform book discovery app fetching and displaying books from the Google Books API.

Tech: Cubit (flutter_bloc), go_router, Clean Architecture (feature-based), Dart, REST API — Responsive UI

Delivery App github.com/jwankhalil/Delivery-App.git

Complete food delivery app with product catalog, cart management, payment flow, and order history.

Tech: GetX (state management & routing), Custom Theming, Dart — Responsive UI

News App github.com/jwankhalil/news-app-flutter.git

News aggregation app integrating a third-party REST API with dynamic theming support.

Tech: Provider, REST API (Dio/http), Custom Theming, Dart

TECHNICAL SKILLS

State Management: BLoC, Cubit, Provider, GetX

Architecture: Clean Architecture, Feature-based structure, MVVM

APIs & Networking: REST API, Dio, GraphQL

Navigation & DI: go_router, GetX Router, get_it

Tools: Git, GitHub, Firebase (Auth, Firestore), Android Studio, VS Code

UI: Responsive Design, Theming, Material Design

EDUCATION

Master's Degree in Web Science — Syrian Virtual University (SVU) | 2025 – Present

Bachelor's Degree in Informatics Engineering — Aleppo University | Sep 2019 – Sep 2024

CERTIFICATIONS

Flutter & Dart: Developing iOS, Android and Mobile Apps — Coursera

The Complete Flutter Development Bootcamp with Dart — Udemy

Deep Dive into Clean Architecture in Flutter — Udemy
